

Fuzzpilz - Oatmeal v38.1 VSTi - Fullpack - ReWork - 32 Bit - 96 MB - Free

Oatmeal is a two-oscillator subtractive synth.

Features:

- **Two oscillators:** Waveform, Amp, Tpitch (aftertouch > pitch), Pulsewidth, PWM rate, PWM depth, Trans (transpose), Detune, Touch (aftertouch > osc amp).
- **Noise (white or bandpassed):** Amp, Touch, Resonance, Transpose.
- **Filter:** Filter type, Double (filter doubling), Cutoff, Track (keytracking), Reso (resonance), Split, Mix, Touch (aftertouch > cutoff), Mod (envelope modulation), Velocity, Filter envelope, Speed ratio.
- **Envelope:** Attack, Hold, Decay 1, Breakpoint, Decay 2, Sustain, Release.
- **Distortion:** Type, Mode, Oversample, Pregain, Limit, Postgain.
- **Chorus:** Mode, Rate, Delay, Range, Feedback, Mix: Dry/wet mix, Voices.
- **Delay:** Unit, Quantize, Input pan, Rotation, Dry, Wet, Length (left and right), Feedback (left and right), Reverse (left and right), Lowpass, Highpass, On/off switch.
- **Reverb:** Room size, Length, Predelay, Early (reflections), Dull(ness), Bright(ness), 1/2/3, rotate, Dry and wet output gain, On/off switch.

- **EQ (5-band parametric equalizer):** Type switch, Frequency, Amp, Slope.
- **Pitch envelope:** Start, Attack, Peak, Decay, Sustain, Release, Velocity, On/off switch.
- **Mod envelope:** Attack, Hold, etc., Mod depth, Mod target, Velocity.
- **Tuning:** Tune, Octave, Cut reference, Pan reference, Notes.
- **LFO (x2):** Shape, Mode, Unit, Rate, Quantize, Cut 1, Cut 2, Resonance, Pitch, Pan, Rate2/1.
- **XY Pad:** Mod depth, Mod target, CC selectors, Vr (XY random radius) and vs (XY random rate).
- **Arpeggiator:** pattern, length, Mode, Unit, Quantize, Step, Arp notes.
- **Skinnable:** Oatmeal is reasonably skinnable.

Fuzzpilz releases Oatmeal - 15th March 2006 (No Longer Available)

Fuzzpilz has released Oatmeal, a freeware two-oscillator subtractive synth VSTi for Windows.

Larger GUI of Limeflavour

The oatmeal sounds really good and with the larger GUI of Limeflavour, it's good for the eyes too. Packed full of all the sound banks, thanks to many fans of the Oatmeal, it has been resurrected.

Thank you MaliceX for your work. I put the larger Limeflavour Skin into the Download.

Install

1. Unrar / Unzip

2. Copy & Paste the:

Fuzzpilz_Oatmeal_VSTi_AIO_May2010

into

C:\Program Files (x86)\VSTPlugins

or

C:\Program Files (x86)\Steinberg\VSTplugins

3. Use the " jBridge " Tool

Select skin

1. Open Oatmeal
2. Select " Skin "
- 3.) Go to the " oatmeal skins "

Example:

C:\Program Files (x86)\VSTPlugins\Fuzzpilz_Oatmeal_VSTi_AIO_May2010\oatmeal skins\38-x

- 4.) If you want the Bigger / Larger Skin:

" Flavours Of Lime " Skin (Oatmeal Lumina, 12-year anniversary update!)

Go select the " If_lumina_r9_1200x945.oms "

" Flavours Of Lime " Skin (Oatmeal Lumina, 12-year anniversary update!)

Saturday, February 6, 2021 | Oatmeal Lumina, 12-year anniversary update!

I've upscaled the size of the lumina skin to 1200x945 for better readability.

It should be sufficient to use with non HiDPI monitors.

There is no support for HiDPI monitors right now.

Upscaled skin can be found here: Lumina r9 -1200x945
